

Virginia Unemployment Claims Data Demographics

Week Ending October 2, 2021 Prepared by EIA/VEC

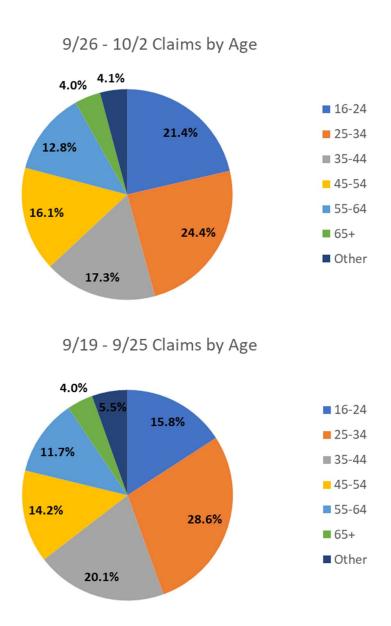

The week of September 26th – October 2nd marks the 81st week since the COVID-19 crisis began in the Commonwealth. There were 9,360 initial unemployment benefit claims this week, a 7.4% decrease compared to the week prior. The following analysis was completed using intrastate and interstate claims data, but not agent claims ¹, therefore, the totals below will not match the state totals when aggregated.

The gender breakdown of initial claims has experienced three distinct phases during the COVID-19 crisis. During the first 14 weeks of the crisis, between the weeks ending March 21st and June 20th, 2020, female claimants made up 56.2% of all initial claims. Throughout the next 44 weeks, until the week ending April 24th, 2021, male claimants made up the majority of initial claims, accounting for 54.7% of all initial claims filed during that time period. The third phase has once again seen female claimants file the majority of the initial claims. Over the last 23 weeks, 52.6% of all initial claimants have been female. For reference, the BLS estimates that approximately 53.0% of Virginia's workforce is Male and 47.0% is female.

¹ When a participant is enrolled, they might receive benefits from a different location than that which is providing them with assistance. Those intermediary claims are considered agent claims.

To analyze the age of initial claimants we first break them up into age cohorts. Since the beginning of the crisis workers in the first two cohorts, ages 16-24 and 25-34, have accounted for the largest amount of initial unemployment benefit claims. Workers in these two cohorts have filed roughly 39.4% of all initial claims since the week ending March 21st. For comparison, workers in the next two cohorts, ages 35-44 and 45-54, have made up 36.8% of initial filings during the same time period. According to a BLS survey of the Virginia workforce, 33.8% of workers are between the ages of 16 and 34 and 41.0% of workers are between the ages of 35 and 54. This disparity between the BLS estimates and the age breakdown of claims leads us to believe that younger workers have been more negatively impacted by the COVID-19 crisis than older workers.

The locality with the most initial unemployment claims this week was Richmond City which had 512 initial filings. Virginia Beach City and Augusta County followed with 479 and 442 initial claims respectively. Of the 133 counties and independent cities in the Commonwealth, 76 saw either a decrease or no change in the number of filings this week compared to the week before. The locality with the largest decrease was Fairfax City which had 74 fewer initial claims compared to the prior week.
